

SERVICE INVOICE

Video Integration & Gallery Upscale Session

Full-day website session including 22-image 4K upscaling, gallery fixes, mobile layout repairs, video production review & editing, Bunny CDN setup, and video section build on homepage and seawalls page.

PREPARED FOR
Contour Marine

DATE
August 14, 2026

INVOICE #
CM-2026-003

DUE
Upon Receipt

This invoice covers a **full extended work session starting at 3 PM on August 13, 2026** and continuing through August 14 — including AI-powered 4K upscaling of 22 gallery images, gallery category fix, mobile stats bar repair, video review and production work (watermark removal, AI upscaling of 2 videos, marketing video review), Bunny.net CDN setup & configuration, and building fully functional autoplay video sections on two pages with extensive cross-device sizing and GoDaddy compatibility debugging. Work was performed across **multiple AI tool sessions consuming significant credits** in addition to many hours of hands-on development time.

SCOPE OF WORK

Services Performed

TASK	DETAILS	AMOUNT
GALLERY — 4K UPSCALING & CATEGORY FIX		
AI Upscaling — 22 Gallery Images to 4K Identified all grainy/low-resolution images across the gallery. Upscaled all 22 images to 4K resolution (up to 4096px) using fal-ai/recraft-clarity-upscale, consuming significant AI processing credits. Images span seawalls, docks, decks, boatlift, and showcase categories. Replaced originals in the images/ directory and committed to GitHub.	22 images	\$95
Gallery Category Fix — seawall-after.jpg Identified and corrected miscategorized dock photo (bollard lighting) that was tagged data-cat="seawalls" instead of data-cat="docks", causing it to appear in the wrong gallery filter tab.	gallery.html	\$15
MOBILE LAYOUT — STATS BAR CTA FIX		
Mobile Stats Bar — “View Full Build Process” Overflow Fix Diagnosed and fixed the CTA button overflowing off-screen on mobile devices. Replaced the broken flex layout with CSS Grid: 3 stats in row 1, full-width CTA spanning all columns in row 2. Tested across 360px, 390px, and 414px viewports. Confirmed zero overflow.	styles.css	\$35
VIDEO PRODUCTION — REVIEW, EDITING & AI UPSCALING		

TASK	DETAILS	AMOUNT
Review of 7 Client-Submitted Videos Reviewed and assessed all 7 uploaded videos (V1-V7) for website suitability: quality, content, branding, and format. Provided written recommendations on which to use, which to upscale, and which to pass on. Also reviewed 2 AI-edited marketing reels (luxury reel + foundation showcase) and provided feedback on fit for homepage vs. seawalls page.	7 videos reviewed	\$40
Watermark Removal — V1 Dock Reel Detected "Similar Shots" watermark overlay in first 4 seconds of V1 dock reel using frame analysis. Trimmed cleanly at 4-second mark using ffmpeg, preserving full remaining footage. Delivered clean trimmed MP4.	ffmpeg trim	\$25
AI Video Upscaling — V4 & V6 to 2K Upscaled V4 (deck showcase) to 2560×1440 and V6 (seawall build) to 1920×1440 using ByteDance AI video upscaler. Multiple attempts required on MOV files (V1, V5) which failed due to format incompatibility — documented and communicated to client.	2 videos upscaled	\$45
 BUNNY.NET CDN — SETUP & CONFIGURATION		
Bunny Stream Account Research & Platform Recommendation Researched video hosting platforms (Vimeo, YouTube, Bunny, Cloudflare Stream) for a no-logo, no-branding solution suitable for a professional contractor website. Recommended Bunny.net at \$1/month with no player branding. Provided full walkthrough for account setup, library creation, and video upload process.	Research + advisory	\$30
Bunny Stream Embed Code Setup — Both Videos	2 embed codes	\$20

TASK	DETAILS	AMOUNT
Configured embed parameters for both videos on Bunny Stream (Library ID 728358): autoplay, loop, muted, responsive settings. Built embed codes for the dock reel (homepage) and seawall build video (seawalls page). Verified player URLs and integration parameters.		
WEBSITE BUILD — VIDEO SECTIONS ON HOMEPAGE & SEAWALLS PAGE		
Dock Video Showcase Section — Homepage Designed and built the full “South Florida’s Premier Waterfront Builder” video section on index.html: dark navy gradient background, teal radial glow, eyebrow label with decorative lines, display heading, subtext, centered vertical 9:16 video player (340px), and two CTA buttons (View Dock Projects / View Seawall Projects). Full scroll-reveal animation. All CSS scoped to avoid sitewide conflicts.	index.html + styles.css	\$65
Build Process Video Section — Seawalls Page Built matching “The Build Process — From Foundation to Finish” video section on seawalls.html with consistent dark branding, white heading override (fixed invisible navy-on-dark bug), teal section label, centered 9:16 vertical player. CSS-scoped styles with white text forced via specificity to override sitewide defaults.	seawalls.html + styles.css	\$55
⚡ GODADDY COMPATIBILITY — VIDEO SIZING DEBUGGING		
Cross-Platform Video Size Debugging & Fix Diagnosed and resolved video player displaying full-screen width on GoDaddy despite correct CSS constraints. Root cause: GoDaddy’s builder injects container CSS that overrides external stylesheets. Iterative fix process: attempted max-width, then fixed width, then aspect-ratio	index.html + seawalls.html	\$60

TASK	DETAILS	AMOUNT
	CSS, finally resolved by migrating all sizing to inline styles on the wrapper div and iframe (width:340px; height:604px) which cannot be overridden. Multiple rounds of testing, packaging, and delivery across 3 fix iterations.	

Gallery Upscaling & Fix	\$110
Mobile Stats Bar Fix	\$35
Video Production & Editing	\$110
Bunny CDN Setup	\$50
Video Section Build (2 pages)	\$120
GoDaddy Compatibility Debugging	\$60
TOTAL DUE	\$485

SAVE ON FUTURE WORK

Monthly Maintenance Plans

Lock in priority support and a lower hourly rate with a monthly plan. Ideal as your website continues to grow with new projects, photos, and seasonal updates.

\$250 / month

Essentials Plan

✓ Up to 3 hours of updates/month

✓ Photo uploads & gallery updates

✓ Text & content edits

★ MOST POPULAR

\$450 / month

Growth Plan

✓ Up to 6 hours of updates/month

✓ New sections & page additions

- ✓ Priority response within 24hrs
- ✓ Monthly GitHub backup

- ✓ Video processing & uploads
- ✓ AI photo upscaling included
- ✓ Priority response within 12hrs
- ✓ Rollover unused hours (1 month)

PAYMENT

Payment due upon receipt via
Zelle to
lg.blueprintsolutions@gmail.com.
Please reference invoice number
CM-2026-003.

▲ AI CREDIT COSTS

Image and video AI processing (upscaling, editing) consumes paid credits per use. These costs are included in the line items above and are not billed separately.

FILES DELIVERED

All source files committed to GitHub (legna0801/Contour-Marine-Website). Packaged .tar.gz archives delivered via download link for direct GoDaddy upload.

HOURS WORKED

Session began 3 PM August 13, 2026 and continued through August 14, 2026 — spanning multiple extended AI tool sessions with high credit consumption throughout.
