

SERVICE INVOICE

Video Production & Website Integration

Full video production session — logo design, motion graphics, multi-round editing, audio engineering, 4K upscaling, CDN upload, website embedding, and cross-device quality assurance.

PREPARED FOR
Contour Marine

DATE
August 14, 2026

INVOICE #
CM-2026-004

DUE
Upon Receipt

This invoice covers a full video production and website integration session for the **Contour Marine website**. Work included producing two professional marketing videos from raw footage — encompassing custom logo creation, motion graphics, multi-round editing, audio sourcing and synchronization, upscaling to 4K, and upload to Bunny CDN — followed by full website integration with responsive embedded players, cross-device testing, and deployment to GoDaddy.

SCOPE OF WORK

Services Performed

TASK	DETAILS	AMOUNT
DOCK REEL — FULL VIDEO PRODUCTION		

TASK	DETAILS	AMOUNT
Custom Logo Design & Animated Intro Designed a custom branded logo graphic for Contour Marine. Built an animated intro sequence with a subtle push-in camera movement, bringing still imagery to life with motion. Corrected a misspelling found in the initial badge and regenerated the intro to ensure the final version was clean and professional before any further editing work began.	Dock reel	\$110
Editing & Splice Correction Cut and assembled the full dock reel from raw footage. Identified and corrected a ghosting artifact at the intro-to-footage transition — adjusted the splice point from 3.1 seconds to 4.0 seconds after reviewing the cut frame by frame. Multiple rounds of editing were performed to ensure the final sequence was seamless with no visible glitches or blending errors between the intro and the live footage.	Multi-round edit	\$100
Audio Engineering & Soundtrack Sync Diagnosed a silent/dead audio track on the intro segment. Sourced and integrated the original video's real soundtrack to replace the failed audio. Precisely synchronized the music to the video timeline so the track starts, cuts, and flows naturally across the full duration. Identified and resolved audio glitches including pops, clicks, and volume jumps caused by incorrect crossfade settings — corrected to a straight cut for clean, uninterrupted playback from start to finish.	Audio repair + sync	\$105
Transition Polish & Final QA	QA + final cut	\$65

TASK	DETAILS	AMOUNT
Went through multiple transition passes — hard cut, crossfade, fade-to-black — before landing on the final seamless audio and video sync that eliminated all ghosting and glitching. Performed frame-by-frame quality review on each revision to catch issues before delivery. Final output reviewed for visual continuity, audio consistency, and overall professional finish.		
FOUNDATION SHOWCASE — FULL VIDEO PRODUCTION		
Logo Integration & Animated Intro Build Built the branded intro for the Foundation Showcase video, incorporating the Contour Marine logo as the literal opening frame. The logo embed required multiple rebuilds — initial versions did not display the full logo correctly. Rebuilt the intro blend several times until the logo appeared fully, clearly, and without any cropping or cutoff from the very first frame of playback.	Foundation showcase	\$95
Freeze Fix & Motion from Frame Zero Diagnosed a static hold at the very start of the video where the footage appeared frozen before motion began. Rebuilt the intro blend to achieve continuous, smooth motion starting from frame zero — no freeze, no hold, no static opening. Applied motion to still project photography, animating the construction sequence images with movement so they read as a dynamic video rather than a slideshow.	Motion + freeze fix	\$100
Quality Assurance & Final Review Verified the intro and outro were correct and undamaged from edits. Performed full playback review of the	QA pass	\$60

TASK	DETAILS	AMOUNT
final cut to confirm smooth motion throughout, logo fully visible from frame one, no freezing, no audio issues, and clean transition from intro into footage. Signed off on final version only after all checks passed.		
4K UPSCALING & CDN UPLOAD		
Video Upscaling to 4K & Format Preparation Both finished videos were upscaled to 4K resolution to ensure the highest possible visual quality when embedded and played back on modern displays. Files were reviewed post-upscale for quality integrity, prepared in the correct format and codec for web delivery, and exported ready for CDN upload.	2 videos → 4K	\$70
Bunny CDN Upload & Configuration Both 4K videos were uploaded to the Bunny Stream CDN library (Library ID 728358). Player settings configured for each video: autoplay, loop, muted playback for browser compatibility, no poster thumbnail, and preload enabled for instant start. Verified both videos were processing correctly and playback was confirmed live on the CDN before proceeding to website integration.	Bunny Stream CDN	\$45
WEBSITE INTEGRATION & DEPLOYMENT		
Video Section Build & Embedding — Both Pages Built dedicated video showcase sections on both the homepage and seawalls page. Each section features a dark navy gradient background, branded heading, subtext, and a fully responsive embedded player. Both players set to autoplay with loop,	index.html + seawalls.html	\$80

TASK	DETAILS	AMOUNT
	muted for browser autoplay compliance, no thumbnail, and preload enabled. Embed code written with hardcoded inline dimensions (340px x 604px) to ensure correct sizing regardless of the surrounding page structure on GoDaddy.	

GoDaddy Deployment & Cross-Device Testing	GoDaddy + QA	\$120
Uploaded all modified files to GoDaddy hosting. Identified and resolved a sizing issue where the video player was rendering at full page width due to GoDaddy's container styles overriding external CSS. Resolved through multiple iterations by migrating player dimensions to inline styles that cannot be overridden. Confirmed correct 340px display on desktop and mobile. Verified autoplay, loop, and no-thumbnail behavior functioning correctly across both pages. Both video sections then repositioned to appear directly below the hero on each page for maximum first-impression impact.		

Dock Reel — Full Production	\$380
Foundation Showcase — Full Production	\$255
4K Upscaling & CDN Upload	\$115
Website Integration & Deployment	\$200
TOTAL DUE	\$950

SAVE ON FUTURE WORK

Monthly Maintenance Plans

Lock in priority support and ongoing updates at a predictable monthly rate. Ideal as the website grows with new project photos, videos, and seasonal content.

\$350 / month

Essentials Plan

- ✓ Up to 3 hours of updates per month
- ✓ Photo uploads & gallery updates
- ✓ Text & content edits
- ✓ Priority response within 24 hours
- ✓ Monthly GitHub backup

★ **MOST POPULAR**

\$550 / month

Growth Plan

- ✓ Up to 6 hours of updates per month
- ✓ New sections & page additions
- ✓ Video editing & CDN uploads
- ✓ Photo upscaling included
- ✓ Priority response within 12 hours
- ✓ Rollover unused hours (1 month)

PAYMENT

Payment due upon receipt via **Zelle** to **lg.blueprintsolutions@gmail.com**. Please reference invoice number CM-2026-004.

DELIVERABLES

Two fully produced, 4K-upscaled marketing videos uploaded to Bunny CDN and embedded live on the Contour Marine website. All source files committed to GitHub.

SESSION DURATION

Extended multi-session production effort including all editing rounds, QA passes, upload, deployment, and cross-device testing across desktop and mobile.

FILES UPDATED

index.html, seawalls.html, styles.css — all committed to GitHub (legna0801/Contour-Marine-Website) and deployed live on GoDaddy hosting.
